Learning, simplified

Hello!

Thank you for your interest in **Hicommands**. We are an ISO 9001:2000 certified elearning company established in 1996 with the aim of spearheading the convergence of technology and learning. We partner with organizations across the world and help them with robust, reliable and cost-effective IT solutions to their learning needs.

We are a professional team of more than 140 trained resources - including artists, animators, instructional designers, subject matter experts, graphic designers and quality experts - who work in unison to ensure every client is delighted. Between us, we have several man-decades of experience in the **design, development and delivery of hybrid media content**.

Our passion is to unleash the potential of technology in learning and to make it accessible to and affordable for every learner. We are focused on sharing our expertise mainly with the education and corporate sectors.

Corporate Solutions

"Only one thing is certain about the future - its **change!"**

In a business environment where innovation and change are no longer mere buzzwords, not only does a company need to constantly adapt and reinvent itself but also train its employees to continuously reequip themselves to perform faster and better and keep up with the change. Training and Development is a key task for any company that values its human resource capital. The challenge is to capture the attention of the employee and ensure that the training objectives are met both in the short term and long term.

We engage with our corporate clients and help them design and implement effective and innovative training material for their workforce. Our Learning Management System (LMS) helps them administer the training easily and track the progress and performance of the employees.

"Tell me and I'll forget; Show me and I may remember;
Involve me and I'll learn."

We are pioneers in providing turnkey solutions to implement IT-enabled education in schools and colleges.

Technology has the power to transform a boring class lecture to an exciting, interactive dialogue between the student and the teacher. **PRODIGY™**, our powerful elearning solution to schools evolved from years of research, facilitates this transformation. Several schools across the world benefit from the curriculum-based education powered by **PRODIGY™**.

PRODIGY™ features

- Multi-platform enabled
- LMS (Learning Management System) powered
- Dynamic exam engine
- Scalable/ flexible question bank
- 5000+ hours digital multimedia content
- SCORM-compliant
- Sound instructional design
- Competency/ skill set evaluation

A hand holding a globe with a world map overlay. The hand is positioned as if holding the globe, with fingers spread. The globe is semi-transparent, showing the continents. The world map is overlaid on the globe, with the same color scheme as the globe. The background is a light blue gradient.

Can we help YOU?

We'd love to hear from you.
